

Nordic Center for Sustainable Healthcare

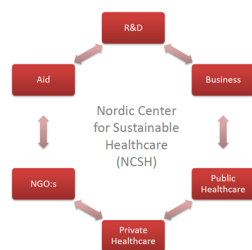

Member meeting September 3

Nordic Center for Sustainable Healthcare

was launched on May 28, 2015, at a kick-off in Malmö. The kick-off also was the final step in the work with the national innovation agenda for sustainable healthcare for Vinnova.

Nordic Center for Sustainable Healthcare shall act as a Nordic platform for all stakeholders operating in the healthcare sector, such as public and private healthcare establishments, businesses working with sustainable solutions, stakeholder organizations and researchers of sustainable healthcare.

What is the next step? There are plentiful ideas for the center, but we are eager to discuss its future development with our members and partners during our first member meeting on **September 3, 2015 at Swecare in Stockholm**.

Today the NCSH has 17 members, and we expect more actors to join us soon. The full list of the members can be found on the back page. The meeting is open for the members, partners and even organizations that intend to join the NCSH.

Don't hesitate to contact us if you have any ideas or suggestions for the member meeting!

Information about the meeting

Where: Swecare, Biblioteksgatan 25, Stockholm

When: September 3, 2015, 13.30 – 16.30

Who: for members and partners of the Nordic Center for Sustainable Healthcare
